

**zunanja stena - masivna lesena konstrukcija, neventilirana, suha obloga, klasični omet**

**external wall - solid wood construction, not ventilated, with dry lining, with rendering**

maksimalna višina stropa = 3,00m, maksimalna obremenitev Ed,fi = 32,0 KN/m maximum ceiling height = 3,00m, maximum load Ed,fi = 32,0 KN/m

GWP Global warming potential

AP Acidification - tendency of component becoming acidified

PEI e Energy consumption during manufacture - sums all renewable energy sources used

EP extent to which a substance containing nitrogen or phosphorus contributes to the production of biomass

POCP Photooxidants are a mixture of reactive gases, harmful to health, which in the presence of sunlight produce anthropogenic emissions (in particular nitrogen compounds and hydrocarbons from exhaust gases)
